"DRUNKENNESS"

Cigarette and Tobacco Habits Cured by

The man who drinks whiskey to excess is speeding his own heart, exhausting his vitality and drawing heavily on his future energy. Try this: Take a mouthful of whiskey and see how long the nerves will allow you to hold it in your mouth; before a minute has passed you will swallow it to get rid of it. The nerves of taste and smell are so adjusted as to protect the stomach against dangerous foods and drinks, but when whiskey is tossed down your throat the nerves are not given a chance to act upon it. Tobacco is less dangerous, but danger and tobacco can consistently be considered one and the same,
